

Insurance for Digital Assets, Web3 & Blockchain Businesses

Specialist insurance solutions for businesses building, operating and supporting the digital asset economy.

Digital asset businesses are creating new products, infrastructure and ways of doing business. Their insurance requirements can be equally specialised.

Clear's Cyber & Technology team can help businesses operating across the Digital Assets, Web3 and Blockchain ecosystem explore insurance solutions designed for emerging technology risks.

From exchanges and custodians to blockchain infrastructure, software developers and payment platforms, we can help you understand the insurance options available for your business.

**Specialist insurance. Specialist market access.
Advice built around your business.**

Who we can help

Built for businesses across the digital asset ecosystem

Digital Assets and Web3 cover a broad range of business models. Clear has access to specialist insurance markets with appetite for businesses across the ecosystem, from the infrastructure that supports blockchain networks through to the organisations holding, trading and transferring digital assets.

Custody, trading and financial services

For businesses responsible for holding, trading or facilitating the movement of digital assets.

Including:

- Centralised and decentralised custodians
- Exchanges and trading businesses
- Financial institutions
- Payment and remittance platforms

Blockchain infrastructure

For businesses providing the technology and infrastructure on which blockchain networks depend.

Including:

- Blockchain infrastructure providers
- Mining and validating operations
- Nodes and associated hardware
- Hardware security modules
- Wallet technology

Web3 organisations

For organisations using decentralised structures and blockchain technology to develop new services and communities.

Including:

- DAOs
- Foundations
- Other blockchain-based organisations

Technology and professional services

For businesses designing, developing and assessing the technology behind the sector.

Including:

- Software and systems developers
- Security auditors
- Relevant technology and hardware providers

Don't see your business listed?

The sector does not always fit neatly into traditional categories. Speak to our Cyber & Technology team and we can discuss your business model and whether suitable insurance options may be available.

All risks are subject to insurer appetite and underwriting.

What can we help protect?

Insurance designed for specialist technology risks

The risks facing businesses in this sector can extend beyond traditional cyber insurance. Clear has access to specialist markets offering a combination of cyber, technology and emerging-risk insurance solutions. The available coverage areas include First-party Cyber, Third-party Cyber, Technology Errors & Omissions, Slashing Insurance, Smart Contract Failure Insurance and Media Errors & Omissions Liability.

First-party Cyber

Designed to respond to certain cyber events affecting your own business, systems or operations.

Third-party Cyber

Protection intended to address certain liabilities arising where a cyber event affects customers, partners or other third parties.

Technology Errors & Omissions

Cover intended for certain claims arising from errors, omissions or failures associated with technology products or services.

Slashing Insurance

Specialist insurance designed to address certain financial risks associated with validator slashing within applicable blockchain networks.

Smart Contract Failure Insurance

Specialist cover intended to address certain financial risks associated with the failure of smart contracts.

Media Errors & Omissions Liability

Cover intended for certain liabilities arising from published, digital or media content.

Flexible solutions for specialist businesses

Depending on the risk and insurer acceptance, available solutions may include:

- Primary and excess capacity
- Comprehensive package policies
- Global appetite
- Customisable coverage
- 24/7/365 cyber incident reporting and response
- Worldwide coverage where permissible
- Flexible premium payment plans

These features are supported by the current insurer proposition.

Actual cover will depend on the policy wording, underwriting, terms, conditions and exclusions.

Why Clear?

Specialist risks deserve a specialist conversation

Digital Asset, Web3 and Blockchain businesses can be difficult to fit into conventional insurance categories.

That is why our starting point is not simply a proposal form. It is understanding what your business actually does.

Understand your business

We take the time to understand your business model, technology, operations and the exposures that matter to you.

Identify the risks

We can help you consider which areas of risk may warrant insurance protection and where specialist cover may be appropriate.

Present your risk

For businesses operating in developing sectors, how the risk is explained to insurers matters. Our Cyber & Technology team can help present your business to specialist markets.

Explore the market

We can approach appropriate insurers and explore available solutions based on your requirements and risk profile.

Support you as you develop

As your operations, technology and exposures change, we can continue to review your insurance requirements with you.

Operating in Digital Assets, Web3 or Blockchain? Let's talk.

Whether you are reviewing an existing programme, entering the insurance market for the first time or simply want to understand what options may be available, speak to our Cyber & Technology team.
