

The clear confidential audit

Setting the insurance benchmark

For many property professionals, the best way to achieve good value is to approach a wide range of potential suppliers. However this might not work well with your current insurance programme.

Why? – well, for many landlords, property owners, developers, block managers and residents there are a small number of Insurers who offer the level of cover and security you and your clients require and they can lose interest if they see a portfolio several times.

The Clear Confidential Audit is a different approach; we review your insurance programme on a no obligation basis without the risk of damaging relationships with your current broker and insurer.

The first step is for us to meet you to understand your business, your objectives and your risk profile. We will then conduct a thorough review of your existing insurance arrangements and report back with any improvements we would recommend. We will also discreetly approach some key insurers suited to your needs to establish a suitable price for the protection you require.
